

AJB-331

AUDIO JAMMER BOX

BLOCKING CELLPHONE RECORDING

Adopting Advanced Ultrasonic Mixing Technology, AJB-331 can block cellphone eavesdropping seamlessly and **senselessly without causing any disturbance.**

Features

100% Protection

Embedded with self-developed Ultrasonic Mixer, can jam the recording function of all iPhone and Android phone.

Safe & Senseless

Adopts Ultrasonic Mixing Technology, no audible noise or electromagnetic radiation. Only block recording, harmless on cellphone hardware

Wireless Charging

Supports cellphone wireless charging at Max. 10W

Adopts high-end SoC charging control chip and heat dissipation design

LED Indicator

Applications

Office

Private Conversation

Home

This device is suitable for all scenarios where you want to block cellphone voice recording or passive recording through eavesdropping apps.

Advantages

- Active Defence — Block the clandestine voice recordings or eavesdropping
- Modern Business Design — Suitable for daily life and business
- Easy to use — LED Status, with wireless charging function

Remark①: By emitting ultrasonic noise that is imperceptible to the human ear, the audio jammer box can effectively block the recording function of cellphones. Communication audio cannot be recorded nor restored. Application effects may vary depending on usage environment, device placement, etc.

Specification

Model	AJB-331
Jamming Method	Ultrasonic Mixing Technology
Wireless Charging	10 W Max.
Power Consumption	<25W
Power Input	DC 12V 3A (Type C)
Working Temperature	-10°C~ 55°C
Weight	219 g
Dimension	214mmx 108mmx 30.5 mm
Packing Box Size	240mmx 138mmx 66 mm

Dimension
