

AJB-336

Cellphone Audio Jammer Box with 4 Slots

AJB-336 adopts ultrasonic mixing technology combined with professional structural design. By placing cellphones in the shielding slots, it can completely block cellphone voice recording and eavesdropping apps safely & **senselessly**. The audio recorded by the cellphone is completely covered by the ultrasonic noise so cannot be recorded normally. File is unable to restore after recording.

Features

- ◎ **Recording Shielding Function:** By adopting our advanced Wave Shield™ ultrasonic mixer, it effectively blocks the recording functions of various types of mobile phones.
- ◎ **Centralized Placement:** Can block the recording of 4 mobile phones at the same time, significantly improving the efficiency of meeting communication.
- ◎ **Safe and Senseless:** Ultrasonic microphone jamming technologies ensure no audible noise or electromagnetic radiation. It is safe and effectively blocks the recording function without causing interference or damage to the mobile phone itself.
- ◎ **Flexible Mobility:** Built-in 6800mAh large-capacity battery, ultra-long battery life, can be flexibly moved and placed anywhere conveniently.

Applications

High-level Meeting

R&D Discussion

Business Conversation

Advantages

- * Active Defence: Block the clandestine voice recordings or eavesdropping.
- * Modern Business Design: Suitable for conference use.
- * Easy to use: Out-of-box use design, no needs expertise.

Specification

Model	AJB-336
Description	Cellphone Audio Jammer Box
Jamming Method	Ultrasonic Mixing Technology
Compatible Phones	All kinds of cell phones including iPhone and Android phones
Shielding Performance	100% Effectively Shielding within the Jammer Box
Capacity	4 Slots
Supported Cellphone Size	≤170mm x 70mm x 20mm
Indicators	Jamming active
Battery	6800mAh (3.7V)
Battery Working Time	≥ 4 hours
Power Supply	12V 1.5A (USB Type-c)
Working temperature	-10°C ~ 55°C
Dimensions	170mm x 82mm x 44mm
Color	Dark Black & Blue
