

### AJB-336

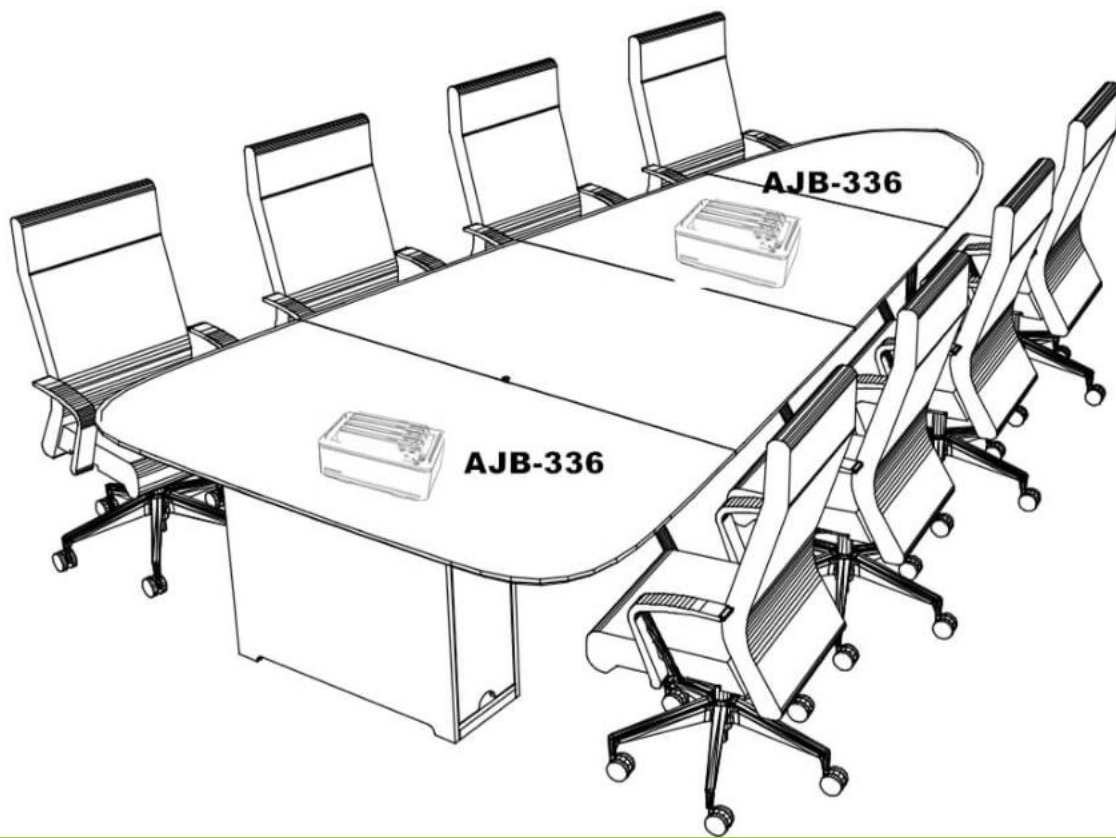

We are thrilled to present to you our pioneering product, the Professional Ultrasonic Cellphone Audio Jammer Box AJB-336. This powerful device employs sophisticated **Ultrasonic Mixing Technology** to provide a sound shield against unwanted audio recording and eavesdropping from cellphone, ensuring a secure environment for your conversations. **100% jamming performance, safely & senselessly!** The audio recorded by the cellphone is completely covered by the ultrasonic noise so cannot be recorded normally. File is unable to restore after recording.

Why should you choose our Professional Ultrasonic Cellphone Audio Jammer Box?

- ✓ **Advanced Ultrasonic Technology:** It generates an ultrasonic barrier that prevents unauthorized audio recording or intrusion completely. No effect on call & sms.
- ✓ **Centralized Placement:** Can block the recording of 4 cellphones at the same time, significantly improving the efficiency of meeting communication.
- ✓ **Exceptional Blocking Performance:** With a 100% effective blocking rate, your concerns about being secretly recorded are a thing of the past.
- ✓ **Safe and Senseless:** Ultrasonic jamming technology ensures no audible noise or electromagnetic radiation, without causing interference or damage to the phone itself.
- ✓ **Flexible Mobility:** Built-in 6800mAh high-capacity battery guarantees an ultra-long operation, allowing you to place it wherever necessary without any power constraints.

### Out-of-box design, no needs professionalism
